(H.M.S. MAIDSTONE,
SUBMARINE DEPÔT.)

President Falconer
University of Toronto

Dear President Falconer:-

I am taking the liberty of sending to you a small souvenir from one of the surrendered U-boats here at Harwich. I had intended to do this some time ago but have been unable to procure anything suitable before this. The object I am sending is a three-bladed propellor from one of the torpedoes in "UB 100". It is not particularly handsome or particularly useful but rather unique and not too clumsy. "UB 100" (or was) is one of the most efficient types of submarine, a boat of about 175 feet in length and three or four hundred tons. This class operated very largely in the Mediterranean.

I have been working in connection with the U-boats ever since I returned to England and have just about had enough of them

H.M.S. MAIDSTONE,
SUBMARINE DEPOT.

by now. I am happy to say I hope home to return very shortly now.

I suppose you, at Varsity, are preparing for a Normal year again next year. I hear that the University is carrying on summer classes for returned soldiers and I suppose there will be a good many take advantage of them. Our lads are returning very quickly. I had a letter some weeks ago from Dr Wallace, in which he told me that both he and Dr Needler had ended their military activities. I should think that the military atmosphere would disappear in Canada, even more quickly than it is doing in England.

I trust that the souvenir will arrive safely.

I remain

Yours faithfully

A.R.M. Lower

Lieut. R.N.R.
